

GP-1003 (0-10,000 mR/hr)

GM Detector

The GP Series detectors are excellent detectors for general gamma monitoring. Its small size and rugged design make the GP Series Detectors some of the most durable and reliable detectors available.

- ✓ Gamma Detection
- ✓ Rugged Housing
- ✓ Compatible with all WB Johnson Instruments (others on request)

GENERAL	Intended for general gamma (dose) measurements
Compatibility	ALL WB Johnson Instruments (others on request)
Operating Voltage	535 vdc
Wall Thickness	.035"
Range	100 μ R/hr-10,000 mR/hr / 0.1 μ Sv/hr – 100 mSv/hr
CPM -mr/hr(Cs-137)	500
Energy Response	50keV - 2 MeV gamma
Sensitive Area	1.1" x .308"
Finish	Epoxy & PVC coated aluminum housing
Dimensions	1" dia x 4" L
Environmental	-20° F[-28° C]-140° F[60° C] 5-95% RH
Weight	4oz
